West St. Paul, Manitoba

EDUCATION

University of Manitoba

Bachelor of Science in Mechanical Engineering — Co-op/IIP Option

Winnipeg, MB

Graduated May 2026

GPA: 3.76 | Dean's Honour List

EXPERIENCE

Manitoba Hydro – GDD

May 2024 – Aug. 2025

Mechanical Engineering Intern

Winnipeg, MB

- Developed detailed CAD models and assemblies in SolidWorks for mechanical components, applying GD&T principles (ASME Y14.5) and Design for Manufacturability (DFM) considerations to ensure parts were optimized for fabrication, precision, and compliance with engineering design specifications
- Prepared and revised technical drawings, BOMs, and engineering reports summarizing design updates and site observations; performed tolerance analysis and stack-up reviews to verify fit and function across mating components; managed document revisions using Autodesk Vault PDM for version control and release tracking
- Conducted Finite Element Analysis (FEA) to evaluate structural integrity, stress distribution, and performance under load conditions for components and mounts
- Led engineering guidance to field technicians during installation and commissioning, documenting findings and resolving design-to-field discrepancies

Manitoba Hydro – CSD

May 2023 – Dec. 2023

Quality Engineering Intern

Winnipeg, MB

- Executed Inspection & Test Plans (ITPs), QC record forms, and quality workflow processes in accordance with company standards
- Developed GIS-based field applications, optimized post-processing workflows, and improved spatial data accuracy
- Integrated AI models with Microsoft Power Automate to extract structured data from PDF documents, reducing manual data entry and increasing data collection speed across 3+ active projects
- Identified and documented non-conformances, tracked corrective actions, and verified timely closeout to maintain compliance
- Standardized QC documentation and inspection procedures across projects through cross-functional collaboration, reducing review cycle time

TECHNICAL SKILLS

Engineering Software: SolidWorks (CAD, FEA, GD&T, Flow Simulation/CFD), AutoCAD, Autodesk Inventor, Autodesk Vault PDM (revision control/release tracking), ANSYS

Design & Analysis: GD&T (ASME Y14.5), Tolerance Analysis & Stack-Up, Design for Manufacturability (DFM), FEA, CFD, FMEA, Bolt & Joint Analysis, Topology Optimization, Material Selection, BOM Management, Engineering Change Orders (ECOs)

Manufacturing Processes: Sheet metal fabrication, CNC machining, weldments, machine shop practices

Fluid Mechanics: Pipe flow analysis, pump selection and sizing, nozzle design, conservation of mass and momentum

Automation & AI: Microsoft Power Automate (AI Models & Flows)

Microsoft Tools: Excel, Word, PowerPoint, Teams, Outlook, Planner

Certifications: WHMIS, Class 5 Driver's Licence

Languages: English, Hindi, Punjabi
